Mathematical Analysis of Groundwater Resources

Bruce Hunt

Mathematical Analysis of Groundwater Resources

Bruce Hunt

Mathematical Analysis of Groundwater Resources Bruce Hunt
Mathematical Analysis of Groundwater Resources focuses on groundwater flow.
The book first discusses the scope of the study, definition of terms, and mathematical preliminaries. The text examines the equations of groundwater flow. Continuum concepts; flux and pore velocities; Darcy's Law for Anisotropic Aquifers; Conservation of Mass equations; and boundary conditions are discussed. The book also underscores the formulation of boundary-value problems. Regional problems, confined flow problems, sea water intrusion problems, and free surface flows are discussed.
The text also looks at the approximate solution of boundary-value problems, inverse problems, and groundwater pollution. The book then presents the exact solutions of steady-flow problems. Problem formulations; analytic coordinate transformations; analytic functions of a complex variable; applications of the Schwarz-Christoffel transformation; and superposition of solutions are described. The text also discusses the exact solution of unsteady problems. The Laplace transform, groundwater recharge problems, well storage effect, and two well recovery problems are discussed.
The book is a good source of data for researchers who are interested in groundwater flow.

From reader reviews:

Jacquelyn Lopez:

The book Mathematical Analysis of Groundwater Resources make you feel enjoy for your spare time. You may use to make your capable considerably more increase. Book can being your best friend when you getting anxiety or having big problem along with your subject. If you can make looking at a book Mathematical Analysis of Groundwater Resources for being your habit, you can get considerably more advantages, like add your personal capable, increase your knowledge about many or all subjects. You may know everything if you like start and read a reserve Mathematical Analysis of Groundwater Resources. Kinds of book are several. It means that, science e-book or encyclopedia or other people. So , how do you think about this book?

Billy Anderson:

Hey guys, do you really wants to finds a new book to learn? May be the book with the headline Mathematical Analysis of Groundwater Resources suitable to you? Typically the book was written by popular writer in this era. The particular book untitled Mathematical Analysis of Groundwater Resourcesis the main of several books which everyone read now. This specific book was inspired many people in the world. When you read this book you will enter the new way of measuring that you ever know ahead of. The author explained their idea in the simple way, therefore all of people can easily to recognise the core of this reserve. This book will give you a great deal of information about this world now. So that you can see the represented of the world in this particular book.

Marsha Cox:

Your reading sixth sense will not betray you actually, why because this Mathematical Analysis of Groundwater Resources reserve written by well-known writer who knows well how to make book which can be understand by anyone who all read the book. Written within good manner for you, dripping every ideas and producing skill only for eliminate your personal hunger then you still doubt Mathematical Analysis of Groundwater Resources as good book not simply by the cover but also by content. This is one e-book that can break don't assess book by its protect, so do you still needing an additional sixth sense to pick that!? Oh come on your looking at sixth sense already said so why you have to listening to yet another sixth sense.

Jennifer Witherspoon:

A lot of publication has printed but it is unique. You can get it by net on social media. You can choose the very best book for you, science, comedian, novel, or whatever by means of searching from it. It is called of book Mathematical Analysis of Groundwater Resources. You can add your knowledge by it. Without departing the printed book, it might add your knowledge and make a person happier to read. It is most essential that, you must aware about guide. It can bring you from one place to other place.
