**Half-Linear Differential Equations (North-Holland Mathematics Studies)** Ondrej Dosly, Pavel Rehak

The book presents a systematic and compact treatment of the qualitative theory of half-linear differential equations. It contains the most updated and comprehensive material and represents the first attempt to present the results of the rapidly developing theory of half-linear differential equations in a unified form. The main topics covered by the book are oscillation and asymptotic theory and the theory of boundary value problems associated with half-linear equations, but the book also contains a treatment of related topics like PDE's with p-Laplacian, half-linear difference equations and various more general nonlinear differential equations.

- The first complete treatment of the qualitative theory of half-linear differential equations.
- Comparison of linear and half-linear theory.
- Systematic approach to half-linear oscillation and asymptotic theory.
- Comprehensive bibliography and index.
- Useful as a reference book in the topic.

### **From reader reviews:**

#### **Billy Reynolds:**

The book Half-Linear Differential Equations (North-Holland Mathematics Studies) give you a sense of feeling enjoy for your spare time. You may use to make your capable much more increase. Book can to get your best friend when you getting strain or having big problem using your subject. If you can make reading a book Half-Linear Differential Equations (North-Holland Mathematics Studies) to become your habit, you can get more advantages, like add your current capable, increase your knowledge about many or all subjects. You may know everything if you like open and read a publication Half-Linear Differential Equations (North-Holland Mathematics Studies). Kinds of book are several. It means that, science book or encyclopedia or other folks. So , how do you think about this guide?

#### **Norman Brown:**

The reserve with title Half-Linear Differential Equations (North-Holland Mathematics Studies) possesses a lot of information that you can study it. You can get a lot of advantage after read this book. This book exist new information the information that exist in this e-book represented the condition of the world at this point. That is important to yo7u to understand how the improvement of the world. This kind of book will bring you throughout new era of the glowbal growth. You can read the e-book in your smart phone, so you can read the item anywhere you want.

A lot of people always spent their particular free time to vacation as well as go to the outside with them family members or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, as well as playing video games all day long. In order to try to find a new activity that is look different you can read any book. It is really fun for you personally. If you enjoy the book which you read you can spent all day every day to reading a reserve. The book Half-Linear Differential Equations (North-Holland Mathematics Studies) it doesn't matter what good to read. There are a lot of individuals who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy the e-book. You can m0ore quickly to read this book out of your smart phone. The price is not to cover but this book offers high quality.

#### **Brandon Justice:**

As a pupil exactly feel bored to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that studying is not important, boring and can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore

this Half-Linear Differential Equations (North-Holland Mathematics Studies) can make you truly feel more interested to read.
