Thorsten Joachims

Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science) Thorsten Joachims

Based on ideas from Support Vector Machines (SVMs), **Learning To Classify Text Using Support Vector Machines** presents a new approach to generating text classifiers from examples. The approach combines high performance and efficiency with theoretical understanding and improved robustness. In particular, it is highly effective without greedy heuristic components. The SVM approach is computationally efficient in training and classification, and it comes with a learning theory that can guide real-world applications.

Learning To Classify Text Using Support Vector Machines gives a complete and detailed description of the SVM approach to learning text classifiers, including training algorithms, transductive text classification, efficient performance estimation, and a statistical learning model of text classification. In addition, it includes an overview of the field of text classification, making it self-contained even for newcomers to the field. This book gives a concise introduction to SVMs for pattern recognition, and it includes a detailed description of how to formulate text-classification tasks for machine learning.

From reader reviews:

Dolores Mann:

Why don't make it to be your habit? Right now, try to prepare your time to do the important work, like looking for your favorite publication and reading a e-book. Beside you can solve your condition; you can add your knowledge by the reserve entitled Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science). Try to face the book Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science) as your buddy. It means that it can to be your friend when you feel alone and beside regarding course make you smarter than before. Yeah, it is very fortunated for yourself. The book makes you more confidence because you can know everything by the book. So , let me make new experience and knowledge with this book.

Arlene Farrar:

Here thing why that Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science) are different and trusted to be yours. First of all studying a book is good but it depends in the content than it which is the content is as delightful as food or not. Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science) giving you information deeper and in different ways, you can find any guide out there but there is no e-book that similar with Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science). It gives you thrill reading through journey, its open up your personal eyes about the thing in which happened in the world which is possibly can be happened around you. You can actually bring everywhere like in area, café, or even in your technique home by train. In case you are having difficulties in bringing the branded book maybe the form of Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science) in e-book can be your substitute.

James Edgar:

As a college student exactly feel bored for you to reading. If their teacher asked them to go to the library in order to make summary for some book, they are complained. Just minor students that has reading's spirit or real their hobby. They just do what the instructor want, like asked to the library. They go to there but nothing reading really. Any students feel that reading is not important, boring and also can't see colorful images on there. Yeah, it is to be complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science) can make you experience more interested to read.

Craig Palmer:

What is your hobby? Have you heard that question when you got college students? We believe that that query was given by teacher on their students. Many kinds of hobby, Every individual has different hobby. And you also know that little person like reading or as examining become their hobby. You need to know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You discover good news or update with regards to something by book. Amount types of books that can you choose to adopt be your object. One of them is Learning to Classify Text Using Support Vector Machines (The Springer International Series in Engineering and Computer Science).
