Real-Time Collision Detection

Christer Ericson

Real-Time Collision Detection Christer Ericson

Written by an expert in the game industry, Christer Ericson's new book is a comprehensive guide to the components of efficient real-time collision detection systems. The book provides the tools and know-how needed to implement industrial-strength collision detection for the highly detailed dynamic environments of applications such as 3D games, virtual reality applications, and physical simulators.

Of the many topics covered, a key focus is on spatial and object partitioning through a wide variety of grids, trees, and sorting methods. The author also presents a large collection of intersection and distance tests for both simple and complex geometric shapes. Sections on vector and matrix algebra provide the background for advanced topics such as Voronoi regions, Minkowski sums, and linear and quadratic programming.

Of utmost importance to programmers but rarely discussed in this much detail in other books are the chapters covering numerical and geometric robustness, both essential topics for collision detection systems. Also unique are the chapters discussing how graphics hardware can assist in collision detection computations and on advanced optimization for modern computer architectures. All in all, this comprehensive book will become the industry standard for years to come.

From reader reviews:

Jerry Linton:

Now a day people that Living in the era wherever everything reachable by connect with the internet and the resources inside can be true or not call for people to be aware of each information they get. How people have to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Reading a book can help people out of this uncertainty Information specifically this Real-Time Collision Detection book because this book offers you rich data and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it as you know.

Lisa Shumaker:

Information is provisions for anyone to get better life, information currently can get by anyone in everywhere. The information can be a expertise or any news even a concern. What people must be consider while those information which is inside former life are hard to be find than now's taking seriously which one is suitable to believe or which one the resource are convinced. If you receive the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen in you if you take Real-Time Collision Detection as your daily resource information.

Janice Wilham:

Do you one of the book lovers? If yes, do you ever feeling doubt when you are in the book store? Make an effort to pick one book that you just dont know the inside because don't assess book by its cover may doesn't work the following is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer is usually Real-Time Collision Detection why because the wonderful cover that make you consider regarding the content will not disappoint you actually. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly direct you to pick up this book.

Rhonda Joiner:

A lot of e-book has printed but it differs. You can get it by online on social media. You can choose the most beneficial book for you, science, amusing, novel, or whatever by means of searching from it. It is identified as of book Real-Time Collision Detection. You can include your knowledge by it. Without departing the printed book, it can add your knowledge and make anyone happier to read. It is most critical that, you must aware about book. It can bring you from one location to other place.
