As an addition to the European postgraduate training system for young neurosurgeons we began to publish in 1974 this series of Advances and Technical Standards in Neurosurgery which was later sponsored by the European Association of Neurosurgical Societies. This series was first discussed in 1972 at a combined meeting of the Italian and German Neurosurgical Societies in Taormina, the founding fathers of the series being Jean Brihay, Bernard Pertuiset, Fritz Loew and Hugo Krayenbühl. Thus were established the principles of European co operation which have been born from the European spirit, flourished in the European Association, and have throughout been associated with this series. The fact that the English language is well on the way to becoming the international medium at European scientific conferences is a great asset in terms of mutual understanding. Therefore we have decided to publish all contributions in English, regardless of the native language of the authors. All contributions are submitted to the entire editorial board before publication of any volume. Our series is not intended to compete with the publications of original scientific papers in other neurosurgical journals. Our intention is, rather, to present fields of neurosurgery and related areas in which important recent advances have been made. The contributions are written by specialists in the given fields and constitute the first part of each volume.

**From reader reviews:**

**Rebecca Clark:**

What do you ponder on book? It is just for students because they are still students or that for all people in the world, what the best subject for that? Simply you can be answered for that query above. Every person has diverse personality and hobby for each and every other. Don't to be pressured someone or something that they don't would like do that. You must know how great in addition to important the book Advances and Technical Standards in Neurosurgery: 023. All type of book can you see on many options. You can look for the internet methods or other social media.

**Nancy Deanda:**

Hey guys, do you really wants to finds a new book to learn? May be the book with the concept Advances and Technical Standards in Neurosurgery: 023 suitable to you? Typically the book was written by popular writer in this era. Often the book untitled Advances and Technical Standards in Neurosurgery: 023 is the main one of several books that will everyone read now. That book was inspired many people in the world. When you read this book you will enter the new dimension that you ever know just before. The author explained their concept in the simple way, therefore all of people can easily to recognise the core of this e-book. This book will give you a lot of information about this world now. To help you to see the represented of the world with this book.

**Laura Dumas:**

Reading a book to be new life style in this season; every people loves to study a book. When you examine a book you can get a lot of benefit. When you read books, you can improve your knowledge, since book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you need to get information about your examine, you can read education books, but if you want to entertain yourself look for a fiction books, these us novel, comics, and soon. The Advances and Technical Standards in Neurosurgery: 023 provide you with a new experience in examining a book.

**Tiffany Zamora:**

Many people spending their time period by playing outside having friends, fun activity using family or just watching TV the whole day. You can have new activity to invest your whole day by looking at a book. Ugh, do you think reading a book can definitely hard because you have to use the book everywhere? It alright you can have the e-book, delivering everywhere you want in your Mobile phone. Like Advances and Technical Standards in Neurosurgery: 023 which is keeping the e-book version. So , try out this book? Let's observe.
