Agroecology in Action: Extending Alternative Agriculture through Social Networks (Food, Health, and the Environment) Keith Douglass Warner

American agriculture has doubled its use of pesticides since the publication of Rachel Carson's *Silent Spring* in 1962. Agriculture is the nation's leading cause of non-point-source water pollution--runoffs of pesticides, nutrients, and sediments into streams, rivers, lakes, and oceans. In *Agroecology in Action*, Keith Douglass Warner describes agroecology, an emerging scientific response to agriculture's environmental crises, and offers detailed case studies of ways in which growers, scientists, agricultural organizations, and public agencies have developed innovative, ecologically based techniques to reduce reliance on agrochemicals. *Agroecology in Action* shows that agroecology can be put into action effectively only when networks of farmers, scientists, and other stakeholders learn together. Farmers and scientists and their organizations must work collaboratively to share knowledge--whether it is derived from farm, laboratory, or marketplace. This sort of partnership, writes Warner, has emerged as the primary strategy for finding alternatives to conventional agrochemical use. Warner describes successful agroecological initiatives in California, Iowa, Washington, and Wisconsin. California's vast and diverse specialty-crop agriculture has already produced 32 agricultural partnerships, and Warner pays particular attention to agroecological efforts in that state, including those under way in the pear, winegrape, and almond farming systems. The book shows how popular concern about the health and environmental impacts of pesticides has helped shape agricultural environmental policy, and how policy has in turn stimulated creative solutions from scientists, extension agents, and growers.

James Sanford:

That guide can make you to feel relax. This kind of book Agroecology in Action: Extending Alternative Agriculture through Social Networks (Food, Health, and the Environment) was bright colored and of course has pictures around. As we know that book Agroecology in Action: Extending Alternative Agriculture through Social Networks (Food, Health, and the Environment) has many kinds or genre. Start from kids until teens. For example Naruto or Private eye Conan you can read and believe you are the character on there. So , not at all of book are usually make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you and try to like reading this.

Ron Matthies:

As a pupil exactly feel bored for you to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just little students that has reading's soul or real their passion. They just do what the professor want, like asked to the library. They go to there but nothing reading seriously. Any students feel that reading through is not important, boring as well as can't see colorful images on there. Yeah, it is being complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. So , this Agroecology in Action: Extending Alternative Agriculture through Social Networks (Food, Health, and the Environment) can make you feel more interested to read.
