Metadata in library information environments is evolving rapidly. This book provides readers with a set of tools for designing, developing, and implementing metadata-rich information systems while also examining the challenges and opportunities in this field.

• Takes a cross-disciplinary approach to the issues, trends, and technologies relevant in information communities such as libraries, archives, and museums

• Presents grounded instruction that makes no assumptions about the technical expertise of the reader—perfect for new graduate students

• Provides structured learning activities that dovetail theoretical learning with the acquisition of hands-on and technical understanding that is essential for real-world success in metadata and information system design

Rebbecca Farley:

As a university student exactly feel bored in order to reading. If their teacher inquired them to go to the library or even make summary for some book, they are complained. Just little students that has reading's soul or real their passion. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that reading through is not important, boring along with can't see colorful photos on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. Therefore this Metadata Standards and Web Services in Libraries, Archives, and Museums: An Active Learning Resource can make you experience more interested to read.
