Target-Centric Network Modeling: Case Studies in Analyzing Complex Intelligence Issues Robert M. Clark, William L. (Leslie) Mitchell

In **Target-Centric Network Modeling: Case Studies in Analyzing Complex Intelligence Issues**, authors Robert Clark and William Mitchell take an entirely new approach to teaching intelligence analysis. Unlike any other book on the market, it offers case study scenarios using actual intelligence reporting format, along with a tested process that facilitates the production of a wide range of analytical products for civilian, military, and hybrid intelligence environments. Readers will learn how to perform the specific actions of problem definition modeling, target network modeling, and collaborative sharing in the process of creating a high-quality, actionable intelligence product. The case studies reflect the complexity of twenty-first century intelligence issues. Working through these cases, students will learn to manage and evaluate realistic intelligence accounts.
