Interacting with Information (Synthesis Lectures on Human-Centered Informatics) Ann Blandford, Simon Attfield

In order to design technologies that better support information work, it is necessary to better understand the details of that work. In this lecture, we review the situations (physical, social and temporal) in which people interact with information. We also discuss how people interact with information in terms of an "information journey," in which people, iteratively, do the following: recognise a need for information, find information, interpret and evaluate that information in the context of their goals, and use the interpretation to support their broader activities. People's information needs may be explicit and clearly articulated but, conversely, may be tacit, exploratory and evolving. Widely used tools supporting information access, such as searching on the Web and in digital libraries, support clearly defined information requirements well, but they provide limited support for other information needs. Most other stages of the information journey are poorly supported at present. Novel design solutions are unlikely to be purely digital, but to exploit the rich variety of information resources, digital, physical and social, that are available. Theories of information interaction and sensemaking can highlight new design possibilities that augment human capabilities. We review relevant theories and findings for understanding information behaviors, and we review methods for evaluating information working tools, to both assess existing tools and identify requirements for the future. Contents: Introduction: Pervasive Information Interactions / Background: Information Interaction at the Crossroads of Research Traditions / The Situations: Physical, Social and Temporal / The Behaviors: Understanding the "Information Journey" / The Technologies: Supporting the Information Journey / Studying User Behaviors and Needs for Information Interaction / Looking to the Future

From reader reviews:

Carlos Garcia:

Often the book Interacting with Information (Synthesis Lectures on Human-Centered Informatics) has a lot details on it. So when you make sure to read this book you can get a lot of benefit. The book was authored by the very famous author. Mcdougal makes some research previous to write this book. That book very easy to read you can find the point easily after looking over this book.

Gregory Rivera:

Are you kind of stressful person, only have 10 or maybe 15 minute in your day time to upgrading your mind skill or thinking skill perhaps analytical thinking? Then you are receiving problem with the book than can satisfy your short period of time to read it because this time you only find reserve that need more time to be read. Interacting with Information (Synthesis Lectures on Human-Centered Informatics) can be your answer because it can be read by you who have those short extra time problems.

Robert Collado:

That publication can make you to feel relax. That book Interacting with Information (Synthesis Lectures on Human-Centered Informatics) was colorful and of course has pictures on the website. As we know that book Interacting with Information (Synthesis Lectures on Human-Centered Informatics) has many kinds or type. Start from kids until young adults. For example Naruto or Private eye Conan you can read and think that you are the character on there. So , not at all of book are generally make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for yourself and try to like reading in which.

Frances Fortier:

Publication is one of source of information. We can add our know-how from it. Not only for students but native or citizen will need book to know the revise information of year in order to year. As we know those ebooks have many advantages. Beside all of us add our knowledge, can bring us to around the world. Through the book Interacting with Information (Synthesis Lectures on Human-Centered Informatics) we can acquire more advantage. Don't that you be creative people? To become creative person must like to read a book. Just choose the best book that ideal with your aim. Don't possibly be doubt to change your life with this book Interacting with Information (Synthesis Lectures on Human-Centered Informatics). You can more inviting than now.
