**Influential scholar Peter L. Berger explores the sociological underpinnings of religion and the rise of a modern secular society**

Acclaimed scholar and sociologist Peter L. Berger carefully lays out an understanding of religion as a historical, societal mechanism in this classic work of social theory. Berger examines the roots of religious belief and its gradual dissolution in modern times, applying a general theoretical perspective to specific examples from religions throughout the ages.

Building upon the author's previous work, *The Social Construction of Reality*, with Thomas Luckmann, this book makes Berger's case that human societies build a "sacred canopy" to protect, stabilize, and give meaning to their worldview.
