New Methods for the Arbitrage Pricing Th Jianping Mei, Jian-Ping Mei

This dissertation consists of two essays on developing new methods for testing the Arbitrage Pricing Theory (APT) and the Present Value Model (PVM), and one essay on correcting heteroskedasticity and cross-sectional correlation in panel study by using the Newey-West Adjustment Matrix. In the first essay, I develop an autoregressive method for testing the APT. Unlike methods currently being used in the literature, this method does not require prior estimation of factor loadings and risk premia. The new methodology is based on the observation that past returns of an asset carry information about its exposure to systematic risks and thus can be used to construct ex post risk adjustments for the asset via a cross-sectional autoregressive model. I derive several testable implications of the APT and drop a crucial assumption that factor risk premia are constant. The approach is robust to changes in factor loadings in some cases. I find little evidence that firm size contribute additional explanatory power to that of factor loadings in the APT model. The second essay studies the rational expectations present value model with variable expected returns. I develop an econometric method with which (i) to test a general model of expected returns and (ii) to test a linearized version of the present value model. I find that share dividend-price ratios carry information about the structure of future dividend growth. I also find that the rejection of the present value model is dependent upon the variability of expected returns. The third essay is an outcome of joint work with Whitney Newey. We show that the Newey-West adjustment matrix can be very useful for correcting heteroskedasticity and cross-sectional correlation in panel studies. We apply that adjustment procedure to the vector autoregression model of Holtz-Eakin, Newey and Rosen and develop a chi-square test to determine the number of pervasive economic factors in an approximate factor model. Our empirical results su

From reader reviews:

Patricia Rhee:

With other case, little people like to read book New Methods for the Arbitrage Pricing Th. You can choose the best book if you appreciate reading a book. As long as we know about how is important any book New Methods for the Arbitrage Pricing Th. You can add information and of course you can around the world by the book. Absolutely right, due to the fact from book you can understand everything! From your country until eventually foreign or abroad you will end up known. About simple factor until wonderful thing you can know that. In this era, we are able to open a book as well as searching by internet system. It is called e-book. You can utilize it when you feel uninterested to go to the library. Let's study.

Brandi Anderson:

Nowadays reading books become more and more than want or need but also turn into a life style. This reading behavior give you lot of advantages. The advantages you got of course the knowledge your information inside the book which improve your knowledge and information. The knowledge you get based on what kind of publication you read, if you want have more knowledge just go with education and learning books but if you want really feel happy read one using theme for entertaining for example comic or novel. The particular New Methods for the Arbitrage Pricing Th is kind of book which is giving the reader capricious experience.

William Marshall:

Do you like reading a guide? Confuse to looking for your selected book? Or your book was rare? Why so many question for the book? But any people feel that they enjoy for reading. Some people likes looking at, not only science book but additionally novel and New Methods for the Arbitrage Pricing Th or even others sources were given information for you. After you know how the good a book, you feel need to read more and more. Science guide was created for teacher as well as students especially. Those books are helping them to put their knowledge. In some other case, beside science guide, any other book likes New Methods for the Arbitrage Pricing Th to make your spare time considerably more colorful. Many types of book like this.

Bernetta Smith:

As a university student exactly feel bored to help reading. If their teacher inquired them to go to the library or make summary for some e-book, they are complained. Just small students that has reading's soul or real their leisure activity. They just do what the teacher want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that studying is not important, boring and can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this age, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this New Methods for the Arbitrage Pricing Th can make you sense more interested to read.
