Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series) Robert Jonathan Cabin

Robert J. Cabin uses the restoration of tropical dry forestland in Hawaii as an in-depth case study to investigate the scientific, practical, and philosophical issues associated with performing ecological restoration in the messy real world.

Interweaving entertaining narratives of his own on-the-ground experiences as a practicing restorationist with reflections about his scientific training and background, Cabin explores the relationship between science and practice in ecological restoration. He observes that because restoration can be complex and value-driven, its implementation often turns out to be as much interdisciplinary art as hard science.

Despite the often distinct cultures and methodologies of scientists and practitioners, Cabin shows how each has a vital role in effective restoration and offers suggestions for improving working relationships.

One approach he advocates is what he calls "intelligent tinkering," after the work of Aldo Leopold. In this model, practitioners employ the same kind of careful but informal trial-and-error strategy followed by such groups as indigenous peoples and hobbyist mechanics. Cabin illustrates the power of intelligent tinkering using examples from his own work and other restoration projects.

The gap between science and practice is not unique to ecological restoration; it is a widespread problem across all fields of applied science. Written in a clear and engaging style, *Intelligent Tinkering* offers an insightful look at the underlying causes of the problem, along with invaluable suggestions for addressing it.

From reader reviews:

Jordan Sampson:

Have you spare time to get a day? What do you do when you have more or little spare time? Sure, you can choose the suitable activity intended for spend your time. Any person spent their own spare time to take a stroll, shopping, or went to the actual Mall. How about open or even read a book called Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series)? Maybe it is for being best activity for you. You recognize beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with it is opinion or you have different opinion?

Donna Jost:

Hey guys, do you would like to finds a new book to study? May be the book with the concept Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series) suitable to you? Typically the book was written by renowned writer in this era. Typically the book untitled Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series)is the main one of several books that everyone read now. This particular book was inspired many men and women in the world. When you read this book you will enter the new dimensions that you ever know prior to. The author explained their concept in the simple way, so all of people can easily to know the core of this guide. This book will give you a wide range of information about this world now. To help you see the represented of the world in this book.

Lorraine Edler:

Beside that Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series) in your phone, it could possibly give you a way to get closer to the new knowledge or information. The information and the knowledge you may got here is fresh from oven so don't be worry if you feel like an older people live in narrow village. It is good thing to have Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series) because this book offers for your requirements readable information. Do you often have book but you do not get what it's all about. Oh come on, that won't happen if you have this with your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Use you still want to miss the idea? Find this book in addition to read it from currently!

Gary Carter:

A lot of guide has printed but it differs. You can get it by world wide web on social media. You can choose the best book for you, science, comedy, novel, or whatever by means of searching from it. It is named of book Intelligent Tinkering: Bridging the Gap between Science and Practice (The Science and Practice of Ecological Restoration Series). You can include your knowledge by it. Without departing the printed book, it could add your knowledge and make a person happier to read. It is most crucial that, you must aware about

publication. It can bring you from one place to other place.
