Chemical Compounds in The Atmosphere T Graedel

Chemical Compounds in the Atmosphere deals with the chemistry of organic and inorganic compounds found in the atmosphere, including rare gases and compounds of oxygen and hydrogen, halogenated aromatic compounds, and organometallic compounds. The sources and concentrations of atmospheric trace gases are discussed, along with their chemical reactions and ultimate fates. The compounds are divided into groups on the basis of chemical constituent or chemical structure.

Comprised of 10 chapters, this book opens with an overview of atmospheric composition and atmospheric chemistry, followed by a discussion on inorganic compounds present in the troposphere such as rare gases and compounds containing nitrogen, sulfur, and halogens. The next chapters focus on hydrocarbons such as alkanes, alkenes, and alkynes; carbonyl compounds such as ketones and aldehydes; oxygenated and nitrogen- and sulfur-containing organic compounds; organic halogenated compounds such as mercaptans and thiocyanates; and organometallic compounds such as organophosphorus pesticides. The final chapter is a synthesis of data on atmospheric compounds mentioned in this text, with emphasis on their occurrence, sources, oxidation, and lifetimes. The chemistry of acid rain is also considered.

This monograph will be of value to those engaged in atmospheric measurements, theoretical and laboratory studies of chemical parameters relevant to the atmosphere, and air quality assessments.

From reader reviews:

Nora Cordova:

The book Chemical Compounds in The Atmosphere give you a sense of feeling enjoy for your spare time. You may use to make your capable much more increase. Book can to get your best friend when you getting stress or having big problem with the subject. If you can make looking at a book Chemical Compounds in The Atmosphere to be your habit, you can get far more advantages, like add your capable, increase your knowledge about a number of or all subjects. It is possible to know everything if you like open up and read a publication Chemical Compounds in The Atmosphere. Kinds of book are a lot of. It means that, science book or encyclopedia or other folks. So , how do you think about this book?

Kathleen Dominguez:

Information is provisions for anyone to get better life, information nowadays can get by anyone on everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider if those information which is inside former life are challenging to be find than now could be taking seriously which one is suitable to believe or which one the resource are convinced. If you receive the unstable resource then you understand it as your main information we will see huge disadvantage for you. All those possibilities will not happen within you if you take Chemical Compounds in The Atmosphere as the daily resource information.

Robert Victor:

Reading a guide tends to be new life style in this particular era globalization. With reading through you can get a lot of information that will give you benefit in your life. Using book everyone in this world could share their idea. Textbooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or their experience. Not only the story that share in the ebooks. But also they write about the information about something that you need instance. How to get the good score toefl, or how to teach your sons or daughters, there are many kinds of book which exist now. The authors on earth always try to improve their proficiency in writing, they also doing some analysis before they write for their book. One of them is this Chemical Compounds in The Atmosphere.

Ian Sharpless:

The book Chemical Compounds in The Atmosphere has a lot of knowledge on it. So when you make sure to read this book you can get a lot of gain. The book was compiled by the very famous author. Mcdougal makes some research before write this book. This book very easy to read you can get the point easily after scanning this book.
