Maternal-Infant Nursing Care: Clinical Companion Elizabeth Jean Dickason RN MA Med, Martha Olsen Schultz RN MA

CLINICAL COMPANION FOR MATERNAL-INFANT NURSING CARE is a valuable, pocket-size clinical reference on the most essential content for normal and high-risk maternal-infant nursing care. The first six chapters are dedicated to providing appropriate information on the normal processes during each stage of the childbearing experience. These include a chapter on fetal assessment and a chapter on key drugs used during pregnancy and lactation. The remaining three chapters highlight important considerations related to high-risk pregnancy, medical problems, and the newborn at risk. An important theme in this text focuses on maternal, fetal, and infant assessment. TOC:

* Pocket-size reference detailing the most essential content necessary for the clinical setting, including antepartal assessment, pregnancy, fetal assessment, labor, birth, recovery, neonatal assessment and care. * Teaching Plans for Home Care highlight the importance of understanding the role of home care in the overall nursing care. * Care Paths and Decision Trees serve as examples of clinical, collaborative tools to introduce students to care implementation in the clinical environment. * Warning Signs boxes alert students to potential problems. * Procedure boxes provide step-by-step information on specific procedures. * Drug Profiles are included in an appendix to provide students with accessible, essential information about the most common medications and their effects on the woman and the newborn.
